REMOTE ONLINE PROCTORING

at the

College of Charleston

**Background**

A very small number of online courses at the College of Charleston require the use of remote online proctoring provided by Examity, which is the preferred provider for courses at the College. Examity was chosen because it works everywhere on campus (in the residence halls, in the library and on the campus wi-fi).

**Examity**

Examity is an online proctoring service that helps ensure the academic integrity of testing in online courses. Examity helps keep the setup, scheduling, and test-taking process simple while offering flexible scheduling options for online courses. Examity offers several monitoring levels, all of which use a webcam to monitor students as they take their exams online. [This video](https://examity.com/test-takers) provides more detail.

**Cost**

Students who use Examity are responsible for paying a fee. Fees vary based on the type of proctoring or authentication used and the duration of the assessment. Please visit [https://examity.com/test-takers/](https://examity.com/test-takers/) for additional details.
